Opis produktu

The bag is made of a black natural fabric (100% cotton), with an original, high-quality print referring to the motifs of BOLESŁAV CERAMICS. Extremely roomy, comfortable and elegant, oval-shaped, decorated with fringes. By giving it an oval shape, it optically slims the figure of the person carrying the bag. It is suitable for a trip, walk, beach, as well as for work, school and university. It fits perfectly into the current ecological trend. The bag was sewn and printed in Bolesławiec according to an individual design, from a fabric woven in the vicinity of the "City of Ceramics". The edges are finished with a trim made of the main fabric.

Patterns of bags are available in a small number of copies. It is possible to make a special pattern on request. The bags are printed with ecological inks in the high-quality DTG digital technology, i.e. direct printing on the fabric. The print is then fixed and thermally hardened. Thanks to this, and also thanks to the use of very good quality fabrics, the bag can serve us for a long time.

It is important to remember about proper washing and maintenance methods, just like we take care of our valuable printed clothes. The bags can be washed at up to 40 ° C in mild detergents. They can be ironed up to 200 ° C, without ironing the print, do not chlorinate, bleach, dry clean, do not tumble dry.
