All dimensions are given in cm. Accepted tolerance up to + / - 5%.

T-shirts are individual models, they are available in a small number of copies. There is a possibility of making a special print on request. They are printed with ecological inks in high-quality DTG digital technology, i.e. direct printing on fabric. The print is then fixed and thermally hardened. Thanks to this, and also thanks to the use of very good quality knitwear, T-shirts can serve us for a long time.

It is important to remember about proper washing and maintenance methods, just like we take care of our valuable printed clothes. T-shirts can be washed at 40 ° C in mild detergents. They can be ironed up to 200 ° C, without ironing the print, do not chlorinate, bleach, dry clean, do not tumble dry. Printed parts should not be ironed on the right side.
