Opis produktu

Sometimes, just a nice piece of clothing is not enough. This scarf is an accessory that will complete a modest, simple stylization and enliven it (e.g. a black base). The shawl is made of 100% linen fabric 170g / m2 in a red and burgundy color (or on request: navy blue, pink, antique pink, salmon, mustard, honey, green, blue). Edges finished smoothly. It fits beautifully around the neck or simply over the shoulders. Due to the large size of the scarf: 240 cm x 40 cm, it can be wrapped around or fancifully tied up. It will add style and elegance to even modest styling. It is warm and very pleasant to the touch. And, as befits linen fabrics, it warms in winter and cools in summer.

LITTLE TIME TO SAINT CHRISTMAS!

The price does not include the packaging. Eco-box as an additional option.

Properties of linen fabrics:

- antiallergic - linen does not sensitize, does not cause irritation and allergic reactions,
- breathable - allows air to pass through,
- thermoregulatory - perfectly conducts heat, warms up in winter, cools in summer, skin in contact with linen sweats less than in contact with cotton or viscose
- hygroscopic - highly absorbent - quickly absorbs moisture but gives a feeling of dryness
- antibacterial - resistant to bacteria and fungi (used to protect food against spoilage)
- biodegradable - ecological - does not contain artificial admixtures, decomposes without polluting the environment,
- durable - a strong fiber makes it resistant to friction and stretching, does not age, does not puff, while using it, it can only become softer and more delicate,
- antistatic - does not pick up static and does not attract dust.

It is important to remember about proper washing and maintenance methods, just like we care for our valuable clothes. Shawls and scarves can be washed at 40 ° C in mild detergents. They can be ironed up to 200 ° C, do not chlorinate, bleach, dry clean, or tumble dry.
